Trusted Experience
Single Source Provider
Robust Security
Quality Management

With over 90 years' experience, Huseby has been providing the highest quality service and technology in the industry.

Our mission is simple, "Excellence in every interaction".

EASY, CONSISTENT SCHEDULING: Schedulers across the country are experts in your local market, ready to assist wherever your case takes you. Drag-n-drop a notice, LiveChat with a local rep, or contact our team for reliable scheduling.

SPECIALIZED COURT REPORTERS come well-prepared with word lists, notices, participant names, and case details. They have a command of special terminology, delivering accurate results. And you can always take advantage of a realtime transcript feed, too!

CASE MANAGEMENT: The Case Manager serves as your single-point-of-contact, overseeing the details and logistics of your case, from scheduling and master exhibit books, to delivery.

SECURE and RELIABLE PRODUCTION: Trusted standing orders ensure reliable turnaround every time in your preferred format(s). Check the status of your transcript 24/7 with the Huseby Transcript Tracker! Huseby's processes and procedures are *designed* to comply with HIPAA and PII security standards.

TRANSCRIPTION: Highly-skilled reporters and transcriptionists can transcribe your audio files. Upload your files to our secure web repository. Audio enhancement services such as noise reduction to reduce static and/or background noise, or editing to remove sections, are also available.

HusebyConnect PROPRIETARY REMOTE PLATFORM: HusebyConnect 2.0 is our newly re-designed industry-leading, proprietary remote deposition platform with live video stream, integrated electronic exhibit presentation, and a case management portal. Utilize TILES to customize your layout.

DEPOSITION HOTSEATERS: Elevate exhibit presentation with an expert hotseater for your depositions, mediations, and arbitrations. They can organize and manage your exhibits before and during your event. They will respond to your verbal commands for exhibit display; mark, annotate, and save marked exhibits per your cues; control and manage break-out rooms; and record witness and exhibit presentation separately so you can utilize picture-in-picture playback at trial.

TRIAL HOTSEATERS: When you're putting arguments in front of a judge, jury, or arbiter, you want visuals that are understandable. Our graphic designers and expert technicians help bring vision to your case and present it clearly.

DEMONSTRATIVES: Show patents, medical procedure diagrams, and more with visually-stunning tech. With complex timelines and processes, graphics reduce intricate concepts to easily-understood, case-winning images for a jury. Pair testimony and arguments with graphics that tell the story how you want it to be told. Leave the jury with a unified, robust mental image that sticks.
