GLOBAL LITIGATION SUPPORT

**85 YEARS** OF  
TRADITION & EXCELLENCE

## **Trial Support Services**

*Empowering Today's Attorney*

# Introduction

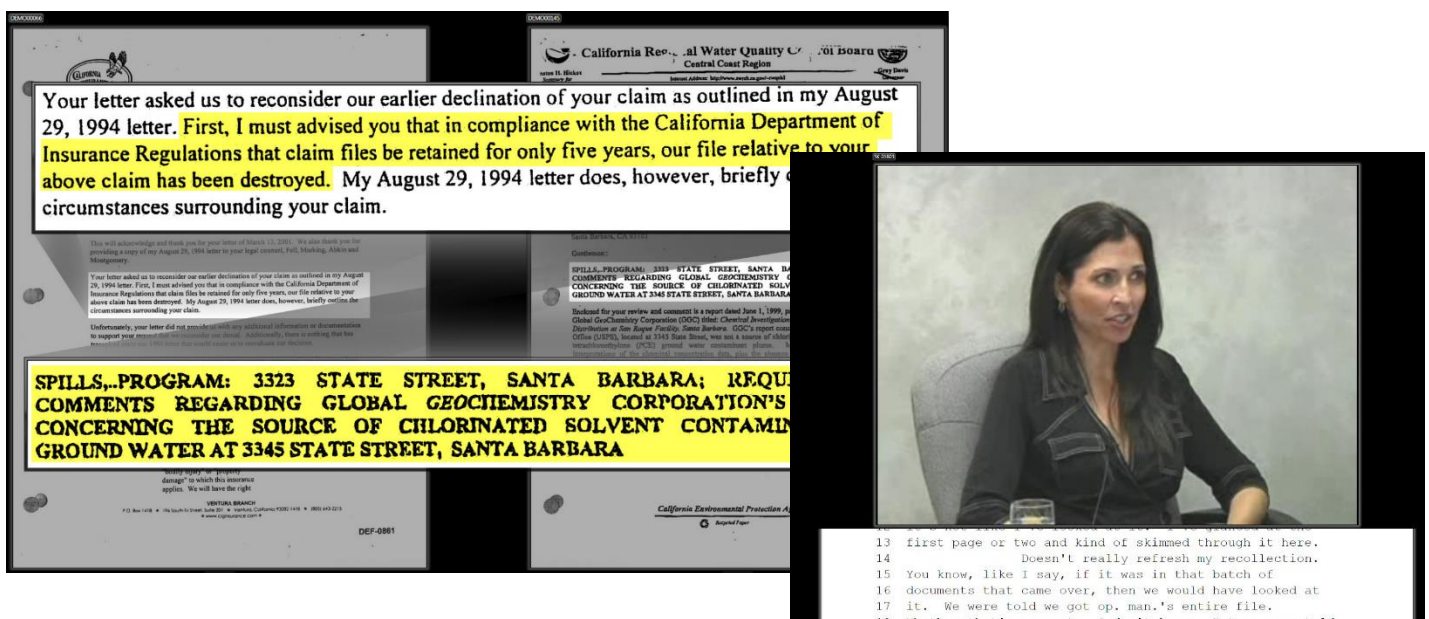

The pages of this guide provide an overview of the tools and technology available for counsel to successfully present their story in trial.

## Exhibit and Video Presentation

Captivate the jury with striking visuals that help illustrate and tell your story. We understand the importance of effectively communicating details and information in the courtroom. Our trial consultants will help ensure your case is well-organized, your exhibits, videos and graphics are presentation ready, and you are well-equipped technologically in the courtroom.

### Features

- "Tear out" a section of a document to focus the jury's attention
- Present exhibits in a side-by-side comparison
- Play a witness's video deposition with or without scrolling transcript text
- Display a section of the transcript to emphasize contradictory deposition testimony
- Overlay exhibits - great for comparing authenticity of a signature
- Generate designation reports and video clips for the court
- Locate exhibits in seconds from trial workbooks

## Document Prep

Huseby provides a comprehensive suite of document management services to make sure you are trial ready. Huseby Trial Services offers document imaging of virtually any type of document, including film and x-rays. Digitized documents can then be made keyword searchable using optical character recognition and stored securely in a repository for access by the trial team 24/7 from any device. The case repository is key word and key phrase searchable. Services include scanning, file conversion, bates numbering, and trial/witness notebooks.

## Graphics and Animation

Our graphics professionals will consult with you and present options and ideas to help you visually present your case. Ask us about interactive 3-D animation. Services Include charts, graphs, interactive timelines, illustrations, 3-D and flash animation and PowerPoint presentations

Let's get started. We are dedicated to adding value from day one.

### Changes in EDC Waste Handling Methods

### Defense Mechanisms: Trachea, Bronchi and Bronchioles

The trachea, bronchi and bronchioles are also lined with mucus membranes and ciliated cells; Here the cilia move the mucus upwards to the throat to clear the respiratory passage. This mechanism is often referred to as the Mucociliary Escalator

# Leading Edge Technology – HusebyConnect

HusebyConnect is a proprietary application introduced in 2013 that provides clients a complete deposition or trial testimony experience in a virtual environment. HusebyConnect has three core components; Live video stream from the witness location, real-time text streaming, and electronic exhibit presentation.

HusebyConnect provides counsel the ability to attend witness prep events anywhere in the world remotely, without incurring travel expenses. All events can be recorded for future playback and case prep.

## Video

Huseby also has a supply of HD 1080p webcams with tripods to provide when a videographer is not requested.

Counsel can choose whether or not to show themselves on video, or just view the witness. Video can be streamed directly into a courtroom for remote trial testimony.

The screenshot displays the HusebyConnect application interface. The main window is titled "Video (1)" and shows a live video stream of a man in a dark suit and green tie sitting in a blue leather chair. The top right of the interface has a "Huseby Exhibit Presentation" header with "SAVE" and "ADD ST" buttons. A sidebar on the right contains an "Editor" section with "Settings" (Size: 20, 40% zoom), "Tools" (Change / Move), "Text or Draw" (Text, Pencil), "Highlight" (Shape, Text HighL), "Shape" (Solid, Outline, Line, Two Side, Left Side, Right Side, Correct, Incorrect), and "Undo" (Undo, Redo). The bottom panel is split into two sections: "Attorney Live Chat (Everyone)" with a message from "Admin Room 4" and "Attorney File Share" which lists two files: "Exhibit Sample 1.pdf" (43 KB) and "Exhibit Sample 2.pdf" (3 KB).

Name	Size
Exhibit Sample 1.pdf	43 KB
Exhibit Sample 2.pdf	3 KB

# Leading Edge Technology – HusebyConnect

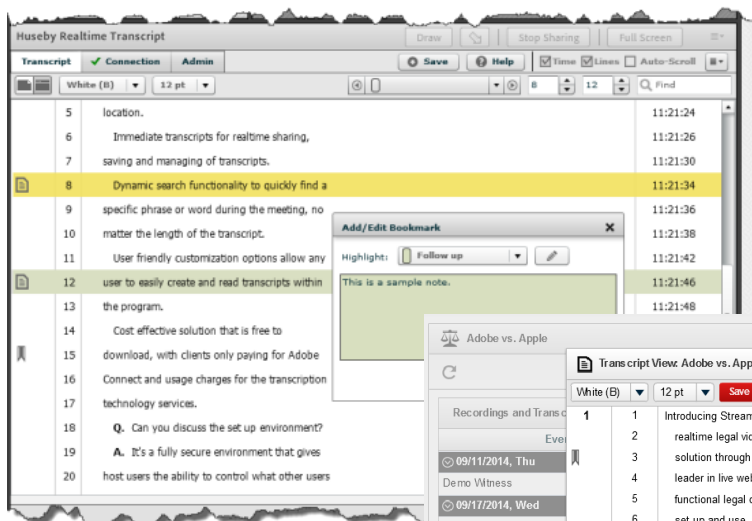

## Remote Real-time Text

The real-time text stream provides counsel a live transcript stream in the court room or from anywhere in the world, with the ability to annotate on the transcript, including notes, issue coding and bookmarking. At the end of the event the transcript is automatically saved directly in counsel's repository for immediate review.

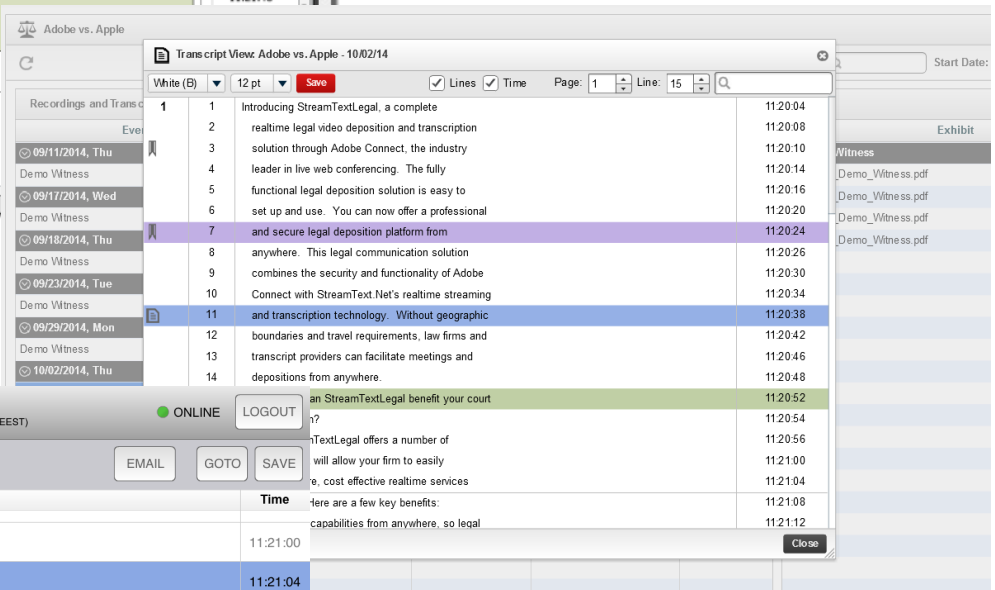

When saved in the repository all highlights, notes and issue codes are available with the ability to make further annotations. When new annotations are made in the mobile app and saved, they are synced with the cloud application.

Counsel also has the ability to export the transcript and annotations into Summation, LiveNote or TextMap.
